Sanam Sitoula

Project Manager/ Software Developer
Kathmandu, Bāgmatī, Nepal

Summary

Highly skilled Project Manager and Full-Stack Developer with over 7+ years of experience in designing, developing, and delivering enterprise-level applications across diverse domains, including Hospitality, Production & Manufacturing, Sales & Inventory, Banking, and Customer Service. Proficient in leveraging Microsoft .NET technologies (C#, .NET Core) and modern JavaScript frameworks (Angular) to build scalable, cloud-based solutions.

Adept at managing cross-functional teams of up to 15 professionals, including developers, QA engineers, and cross-departmental staff, to ensure seamless project execution and timely delivery.

Experienced in implementing ERP systems, optimizing workflows, and driving operational efficiency through Agile methodologies and tools like Jira and Trello.

Demonstrated expertise in deploying cloud applications on Microsoft Azure PaaS services, building REST APIs using MVC/MVVM frameworks, and implementing CI/CD pipelines to adhere to DevOps practices. Skilled in requirement analysis, process improvement, and stakeholder collaboration to deliver innovative solutions that align with business objectives.

With a strong focus on team development, client satisfaction, and data-driven decision-making, I am committed to delivering high-quality, scalable software systems that exceed expectations and drive business growth.

Experience

Janak Education Material Center

Project Manager

April 2022 - Present (4 years 3 months)

Bhaktapur, Bāgmatī, Nepal

-ERP Implementation: Successfully implemented ERP software to streamline processes in inventory management, sales, and accounting, achieving a 20% improvement in overall departmental efficiency.

-Agile Project Management: Utilized Agile methodologies, including sprints, backlog grooming, and iterative development, to manage software implementation projects, ensuring timely delivery and continuous improvement.

-Team Management: Directly managed a team of 15 professionals, including developers, QA engineers, and cross-functional staff, fostering collaboration and ensuring project milestones were met on time and within budget.

-Tool Proficiency: Leveraged project management tools such as Jira and Trello to plan, track, and prioritize tasks, manage workflows, and ensure transparency across teams.

-Requirement Analysis: Conducted in-depth requirement analysis by collaborating with cross-functional teams to understand workflows, pain points, and operational needs, ensuring the ERP system was tailored to meet organizational goals.

-Process Optimization: Identified inefficiencies in cross-departmental workflows and implemented ERP-driven solutions to standardize processes, reduce manual errors, and enhance productivity.

-Staff Development: Trained and mentored staff across departments on ERP system usage and Agile practices, fostering a culture of continuous learning and skill development.

-Performance Monitoring: Established key performance indicators (KPIs) to measure the effectiveness of ERP implementation, regularly reporting on progress and achieving measurable improvements in operational efficiency.

-Stakeholder Collaboration: Worked closely with senior management and department heads to align ERP implementation with organizational objectives, ensuring buy-in and support at all levels.
